

Sensi-Fire™

Wireless Shutter Safety System

NEW
MODERN
DESIGN!

The Sensi-Fire™ Wireless Shutter Safety System is an innovative, wireless DC battery, safety back-up system that automatically opens your roller shutters in the event of a fire, helping protect you and your family.

You can rely on Sensi-Fire™!

Sensi-Fire is absolutely crucial to fire safety. No home or building with roller shutters should be without Sensi-Fire Wireless!

No building with roller shutters should be without **Sensi-Fire™**!

Sensi-Fire™ automatically opens roller shutters, window shutters and roller doors in the event of a fire. Crucial to fire safety, no domestic or commercial building with roller shutters should be installed without **Sensi-Fire™**!

Sensi-Fire™ is a must have for the safety of your family!

How **Sensi-Fire™** works

Totally independent of mains power, the **Sensi-Fire™** Wireless unit is installed in close proximity to a smoke detector. When the smoke detector is activated, **Sensi-Fire™** picks up the audio signal and instantly transmits a radio signal, in turn automatically opening all of your programmed roller shutters, allowing escape routes in and out. (1 unit can operate multiple shutters).
