

# intelliscreens™

*It has never been easier*

---

**Caterpillar Smart track** is a pleated mesh retractable design making it visible up close which acts as a safeguard from walkthroughs but is otherwise invisible enough not to spoil your views.

**Caterpillar Smart track** was designed for, and is perfectly suited for front entrance doors, single doors, French doors, and other smaller door openings.

**Caterpillar Smart track** has only a 4mm bottom track, making it perfect for doors with heavy foot traffic, wheel chair access, and flush floors.

**Caterpillar Smart track** is incredibly easy to install for the DIYers, all you need is a drill and some common sense.

**Caterpillar Smart track** comes in a wide range of Powder coat colours and can be made to match your existing door configuration.

**Caterpillar Smart track** can be made in a stacking configuration essentially making the widths it can span endless by just adding another screen panel.

**Caterpillar Smart track** is a spring-free design, it can be moved at any point along the handle using just your finger, perfect for the kids or elderly.

**Caterpillar Smart track** has a smaller grade mesh than standard fly screens in Australia, helping to keep the smaller insects away from your family.

**Intelliscreens™** is the manufacturer and as such you can expect direct from the manufacturer prices and savings.

---

**Intelliscreens™** is an Australian company which has invested heavily into providing the market with a simple but extremely beautiful pleated screening solution for large openings.

Each year, demands on architects to provide bigger openings with designs that bring the indoors to the outdoors have proven difficult for the screening industry to keep up with. **Intelliscreens™** has met this head on with their signature screen called **Slimline Panorama™**.

With the company's yearly growth rate exceeding market average, it is expected to continue to grow with new products ready to be released into the market in the very near future.

**Intelliscreens™** also has released a system called the **Duo Screen™** which incorporates an insect screen by day and a dim-out screen by night to provide the home with elegance and privacy. Ask about it today.
