

intelliscreens™

It has never been easier

Slimline Panorama™ is a pleated mesh retractable design making it visible up close which acts as a safeguard from walkthroughs but is otherwise invisible to not spoil or take away from the outdoors and your views.

Slimline Panorama™ can screen larger bifold and stacker doors or smaller French doors, etc without affecting the existing door configuration. There's literally no opening, door or window, large or small that cannot be screened.

Slimline Panorama™ glides from end to end all while remaining perfectly levelled and does not rely on springs to retract making it simple, easy, and safe to operate for both young children and the elderly.

Slimline Panorama™ uses a mesh with much finer fibres than the standard spring style retractable screen systems, the design of the screen enables them to be completely unobtrusive, whilst letting the natural light and fresh air in.

Slimline Panorama™ is perfectly suited to screen openings up to three metres tall and over five metres in a single span.

Slimline Panorama™ comes in a wide range of Powder coat colours and can be made to match your existing door or design configuration.

Slimline Panorama™ is as its name suggests – slim, only 32mm with only a 15mm deep bottom track making it one of the smallest on the market without losing anything in ability to screen larger openings.
