Control Your Environment, Privacy & Comfort with the
NEW innovative Slidetrack [®] **Blind.**

Proudly Australian designed and manufactured.

Your World SLIDETRACK® BLINDS

The introduction of 'track style' blinds has revolutionised the market. It has allowed homeowners to create fully enclosed Outdoor Living Areas.

Your Slidetrack® Blinds are the perfect outdoor enclosure solution. Whether you are trying to keep sun, wind, rain or insects out, we have a multiple of mesh & blind options to suit your needs.

Simple & Stylish Design – One-handed operation with a central locking mechanism means they are simple to use and can be locked at numerous height levels (personalised to you). There is no need for ropes, pulleys, zippers or straps as older style blinds require. Designed to be unobtrusive and present clean functional lines our wide colour range will complement the appearance of your property.

Strong & Durable – The screening fabric & bottom bar is firmly secured within the side tracks resulting in a strong design making it near impossible for the blind to come out. All exposed parts are made from stainless steel or powder-coated aluminium. This design sets it apart from other 'track style' blinds which rely on plastic components to hold onto the track.

Sun & Heat Protection – Our 95% UV protection mesh is the great all-rounder. With a 5% fabric openness, you still have the ability to view out while blocking 95% of heat -Great for summer use. Another mesh benefit is its ability to block out wind and most rain. Put a heater into your outdoor area and it will help retain the heat! The perfect all-year round solution.

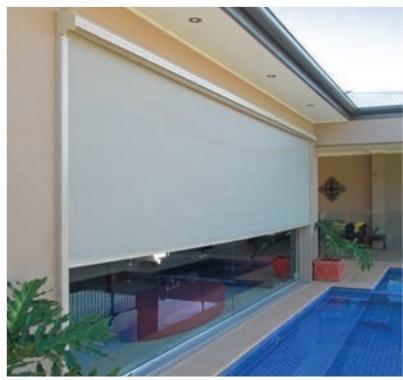

Insect Protection & Airflow – Our 60% UV protection mesh will maximise breeze while keeping annoying insects out. We add a sealing strip or valance to the bottom bar as extra protection. By adding an enclosed pelmet around the top blind roll you will further insect proof your outdoor area. Although not full sun-blind mesh, it still offers effective heat reduction.

Privacy – Our 99% UV protection mesh has all the benefits of the 95% range with the added benefit of not allowing outsiders look in. Full block options are also available.

Café Blinds – An old favourite, clear or tinted PVC Café Blinds are ideal for creating a cosy environment while maintaining an open feel. Perfect for winter use.

Motorised Option – All blind options can be fitted with remote controlled Somfy motors. Multiple blind options can be operated by the one remote separately or all at once. Thus creating the ultimate luxury blind system.

SunScreens Café Blinds

Freedom Slidetrack® Blinds' unique fabric guide system maintains perfect tension.

Locking pins are centrally located and intermediate locking positions are easily provided.
