Ziptrak® Clear PVC blind with Cast Bracket in white.

Enjoy your privacy without compromising the view

Enjoying a sense of privacy while keeping the external views with the use of modern Sunscreen Mesh fabrics. Or for uninterrupted views and maximum rain protection choose Clear PVC with your Ziptrak® blind system.

Maximise the use of your outdoor space

Spend more time with family and friends enjoying the outdoors regardless of the weather. Ziptrak® blinds help you extend the use of your outdoor entertainment areas by capturing warmth during the winter months or allowing fresh breezes to flow through during summer.

Ziptrak® creates a barrier from weather, insects, dust, leaves and other debris and reduces the time spent on cleaning and maintenance of your outdoor area and furnishings.

The unique design combination of the Ziptrak® blind system with a Streamline Pelmet containing our Insect Control System adds an additional barrier that other outdoor blinds cannot offer.

Streamline Pelmet with Insect Control System

Ziptrak® Sunscreen Mesh blind with Traditional Pelmet in Woodland Grey.

Effortless smooth operation

Ziptrak® Spring-Balanced technology permits effortless smooth operation. Simply push the blind up or pull the blind down and your Ziptrak® blind will stay where you leave it. You can also lock your blind into place by pushing down into the lowest position and engaging the Ziptrak® Centre-Lock-Release mechanism. To unlock, lift the handle to activate the release latches and lift.

Optional motorisation is also available – with remote control instead of manual operation, useful for multiple blind applications or installations in hard to reach locations like outside of windows or heights.

Spring Balanced Technology

- One-touch convenience
- Quick and easy-to-use
- Leave at any height

Designed for all the family

The Ziptrak® patented Track-Guided Blind System with its unique spline binding creates a gap less barrier on all sides of a blind – keeping out dust, wind, rain and insects. Our design also presents a safe environment for children and pets with no cords, crank handles, zips or external wiring.

Design *your* blind

Each Ziptrak® blind is custom made and installed to your individual needs and specifications. With a wide variety of colour options, styles and features available to match or complement your outdoor space.

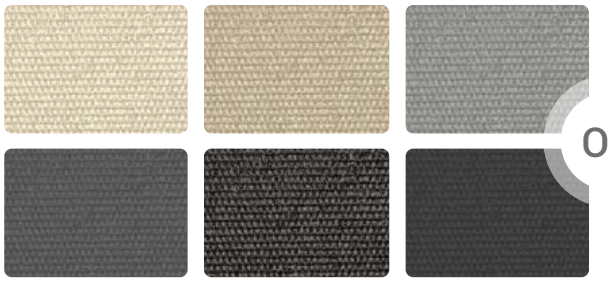
1 Made to order sizing

	Width		Height	
	Min	Max	Min	Max
PVC	0.625m	5.5m	0.5m	3.5m
Sunscreen Mesh	0.625m	6m	0.5m	3.5m

Need a larger blind or would like to include a doorway? Ask your retailer about the Ziptrak® Removable Post system.

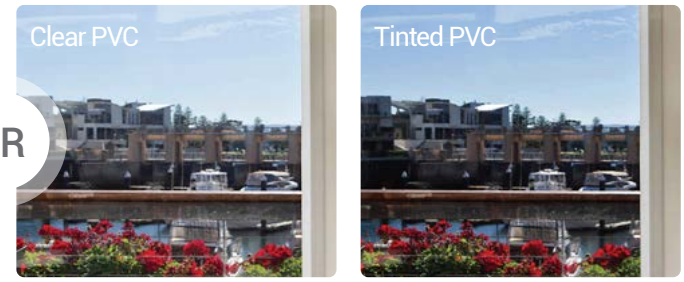
2 Select the skin type

Sunscreen Mesh



- Available in a wide range of colours and transparencies.
- Up to 99% UV block.
- Up to 96% wind block.
- Significantly reduces sun glare.
- Allows airflow.
- Provides high degree of privacy during the day.
- Easy-to-maintain material; looks great for years and requires low maintenance.

PVC



- Available in clear or tinted.
- Highly engineered plastic made specifically for outdoor blinds in Australia's harsh climate.
- Provides complete blockout of wind, dust, rain and debris.
- Completely see through for uninterrupted views.
- Is the best material choice to maintain the temperature within the space.
- Take advantage of the winter sun.

*Sunscreen Mesh and PVC products are complementary to the Ziptrak® system but are not manufactured or sold by Ziptrak Pty Ltd. Please speak with your retailer about the range, warranty and technical specifications of these products. We recommend making your selection after viewing actual product samples in your outdoor area. Varying light conditions and printing processes can affect colour tones represented in this catalogue.

3 Select the hardware colour

Ziptrak® aluminium componentry is readily available in six colours or can be powder-coated to any conceivable colour to match the décor of your existing outdoor area.

White | Classic Cream | Paperbark | Black | Woodland Grey | Monument | Choose your own custom colour

4 Choose from the Pelmet or Bracket options

The Streamline Pelmet provides superior weather protection, ensuring your blinds look great and operates flawlessly for years.

A Traditional Pelmet can also be installed, concealing and protecting your blind when retracted or a simple Cast Bracket with Back Flashing can be utilised leaving the blinds exposed but hidden from view from one side.

Traditional Pelmet

Cast Bracket with Back Flashing

Cast Bracket

5 Choose from the Bottom Bar Weather Protection options

The Standard or Large Weather Strip offers extra protection for your entertainment area. Closing gaps effectively and blocking weather and other debris.

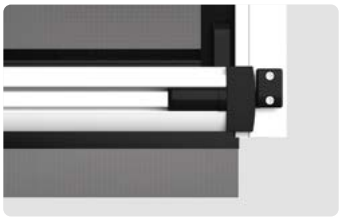
For acutely sloping surfaces your Retailer can offer a custom-made skirt or 'valance'.

Where no gaps are present a Basic Bottom Bumper prevents surface damage but does not provide weather protection.

Standard Weather Strip (15 mm)

Large Weather Strip (30 mm)

Basic Bottom Bumper



Custom-Made Skirt

6 Choose either manual (spring balanced) or motorised operation

Centre-Lock-Release Mechanism (exclusive for manual operation)

Front Handle

Lock your blind in place when fully down (closed).

Reverse Handle

Add an extra handle to operate the blind from the other side.

Pull Stick

Request a pull stick to avoid reaching up high or bending low to operate your outdoor blind.

Motorisation

Ask your local Retailer for details about convenient motorisation and SolarSmart™ options, only available with Sunscreen Mesh.

UVR Protection: The amount of UV Radiation that is transmitted through a fabric. Mesh fabrics can block up to 99% of UV Radiation depending on individual technical specifications. This is important when considering protection of outdoor flooring, furnishing fabrics and furniture against fading. **Privacy:** The openness or proportion of holes in woven fabrics affects the degree of visibility. Dark colours may provide outgoing visibility with daytime privacy whereas light colours offer greater heat protection efficiency but with lower privacy. **Wind Protection:** The amount of wind that can pass through the blind when completely closed. The amount of wind blocked by the system will vary depending on the type of fabric and blind configuration selected. **1** Testing performed by the University of Adelaide showed that the Ziptrak®Blind System of 2.5m by 2.5m can resist a wind loading up to 82.4km/hr when installed with aluminium rivets and up to 139km/hr when installed with stainless steel rivets. Installation is crucial to determining the performance of a blind in windy conditions. For commercial applications, and in areas prone to high winds, we recommend a greater number of fixings to the mounting structure. It is recommended that stainless steel rivets be utilised between the track and channel. **2** Sunscreen Mesh and PVC products are complimentary to the Ziptrak®system but are not sold or manufactured by Ziptrak Pty Ltd. Technical specifications can differ between products. Please speak with your retailer about the range, warranty, and specifications of these products. We recommend making final selections after viewing actual samples. * Pressure on Sunscreen Mesh fabrics due to wind and rain conditions can increase water penetration through these fabrics.
